

AG WEATHER TOOLS APP®

for Android and iPhone

This customizable mobile weather app delivers comprehensive ag weather information, keeping you connected and operating more efficiently than ever.

Weather is one of the biggest risk factors that producers must manage on a daily basis. With the success of operations dependent on the accuracy and timeliness of weather-based decisions, agriculture professionals need to have access to the most trusted ag weather information at all times. That's why DTN/*The Progressive Farmer* has developed the innovative new Ag Weather Tools mobile app — taking the guesswork out of running a farm operation.

A comprehensive suite of weather tools for the agriculture professional:

- Professional ag industry features and commentary
- Easy-to-navigate summary information in a convenient mobile format
- Tailored to producers and agribusiness managers
- Meant to be taken from field to field with DTN's exclusive, patented automatic roaming mobile alerts

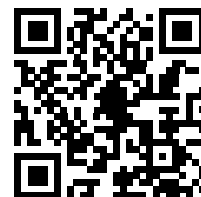

Control the information that matters to you:

- Create custom alert thresholds for forecasted and observed weather conditions, precipitation amounts, dangerous storm attributes, and more
- Access comprehensive layered satellite maps where you can reveal as much or as little detail as you desire
- Get the most accurate localized hourly and daily forecasts in the industry
- Stay up to date with ag weather news and analysis from DTN/*The Progressive Farmer* meteorologists, including a daily Market Weather Outlook video

Where can I get it?

The app is available from the Google Play Android market and iTunes. A free 30-day free trial of the app is available to download at www.dtnpf.com/go/agweathertools.
