

DTN AG WEATHER STATION

Increase yields and savings

Introducing DTN Ag Weather Station, our new, affordable professional grade weather station.

With DTN Ag Weather Station, we've taken field-level weather one step further. This exciting solution provides highly-localized forecasts and alerts for the immediate, surrounding area, and observes and records critical weather and agronomic data for your use.

Use it as a standalone solution or incorporate it with our proven DTN Grains® solution's robust weather tools to help you...

- **Better allocate resources** — improve placement of people and equipment, as well as the timing of chemical applications and irrigation
- **Boost yields** — through strategic operations, such as planting and chemical applications, with insight into inversion layers, seed bed temperatures, wind conditions, and more, for your exact field
- **Support greater cost savings** — reduce energy costs through highly-targeted irrigation decisions
- **Enhance your operational efficiency** — improve planning and scheduling with the most precise possible forecasts for your exact location, plus automated documentation of historical weather
